

# FIFF Suggestions

## Apple Slinky Machine

This amazing gadget peels, cores and slices an apple all by simply turning the handle. Create apple slinkies that will tempt even those children who say they don't eat fruit. Sell the Apple Slinky Machine to families and make a profit on each gadget sold. Have an Apple Slinky stall at the school fete.....

## FIFfy Food Stalls

Food always sells well at school events. We have a range of new ideas to sell more fruits and vegetables, as well as including fruits and vegetables in all the old favourite stalls. We have tips for every step including planning, buying, costing, cooking and cleaning. These ideas can be applied to any events where catering is required, such as the school fete, movie nights, special lunches and sports carnivals.

## Fruit & Vegetable Co-op

Everyone needs to buy fruits and vegetables every week for their family. Why not buy it from the school? We can show you how to link with a local and reliable supplier who will collect your order at school and then deliver it so you can pick it up along with the kids. Your school can make the profits instead of the supermarket.

## Mango Drive

*The Mango Fundraiser* has been professionally and successfully operating mango drives in Queensland schools for several years. It's so simple with all the instructions and forms provided. *(Operates in mango season November – February)*

## Other fruit and vegetable drives

Do you have an idea for a different sort of drive? Maybe cherries or nuts? Use our package of step-by-step instructions, forms, advertising and ways to link with suppliers, to create your own, unique drive.

## Smoothie/Juice Bar

Smoothies and Juices are so popular (and delicious!). Our package contains lists of everything you need, details of the best juicers and blenders at the best prices, recipes and tips from schools who have already had success with this fundraiser.

## Vegathon

Based on the traditional spellathon concept, children obtain sponsorship for all the vegetables they eat in a week. A great way to get even the most hardened vegetable spitters to give some a try. The kit contains sponsorship forms, articles for the school newsletter and lots of recipe and follow-up ideas.
